

Christoph Weiler

Lead Software Developer & Technical Architect · Freelancer

Full-stack engineer with more than ten years of shipping production systems in Java/Kotlin, Go and TypeScript. I lead small teams, own architecture end to end and take products from first commit to customers, most recently an AI-native manufacturing system built from scratch. Lead developer of teams of three to five.

SKILLS

LANGUAGES	Java, Kotlin, Go, TypeScript, Python, C#, C++	BACKEND	Spring Boot, event sourcing, PostgreSQL, NATS JetStream, RabbitMQ, REST/SOAP
FRONTEND	React, Angular, Vue, Tailwind, cross-platform builds (iOS, Android, desktop)	AI	Anthropic API, AWS Bedrock, MCP servers, LLM-assisted configuration, scikit-learn, OpenCV
INDUSTRIAL	OPC UA, Modbus TCP, MQTT, AMQP, MES, ERP integration (Infor)	CLOUD & OPS	Docker, OpenShift/Kubernetes, Google Cloud, Azure, GitLab CI, GitHub Actions, Caddy

EXPERIENCE

06/2026 - now
Self employed

Founder & Lead Developer

[Werkspur](https://werkspur.com) · werkspur.com

AI-native Manufacturing Execution System for small and mid-size manufacturers. Tracks every lot through every production step with full genealogy, live machine data and KPIs in Euro, running on a single on-premise server. Designed, built and shipped end to end.

- Go modular monolith, event-sourced on PostgreSQL with NATS JetStream; React 19 + TypeScript frontend
- AI assistant on the Anthropic API and AWS Bedrock that drafts views, SQL queries and workflows from natural language; the system is also exposed as a remote MCP server for Claude and ChatGPT
- Python anomaly-scoring service on machine telemetry (FastAPI, scikit-learn)
- Integrations: OPC UA, Modbus TCP, MQTT, AMQP/RabbitMQ, REST and SOAP for ERP systems, inbound webhooks
- Runtime-configurable views, queries, actions and triggers without code; tamper-evident HMAC-chained audit log
- On-premise Docker stack behind Caddy, GitHub Actions CI, offline Ed25519 licensing, self-healing updater with automatic rollback

10/2019 - now
Freelance

Full Stack Developer & Technical Architect

[HappyFoto](https://happyfoto.at) · happyfoto.at

Large-scale photo-product platform where customers design and print almost anything. Thousands of customers a day, millions of photos processed.

- Java/Kotlin + Spring Boot backend and Spring Authorization Server
- Angular frontend shipped to iOS, Android, Mac, Windows and Web from one codebase
- Python image processing with OpenCV for photo analysis and preparation
- Distributed system across several Austrian data centers, deployed via GitLab CI to OpenShift
- Led the team through the fixed-price phase; weekly advisor to the project lead

10/2019 - now

Freelance

Further freelance projects

Neuman Aluminium · MES system, lead developer of 4

- Kotlin + Spring Boot, React + TypeScript, Keycloak SSO (OpenID Connect), WebSockets for live updates
- OPC UA machine communication, reporting to Infor ERP, GitLab CI to Docker Swarm

EOS Technology Solutions · technical-debt reduction

- C++ service layer, Java + Spring Boot microservices, Java Swing frontend

Jetlevel · internal platform, team lead of 3

- Java + Spring Boot, Vaadin Flow, Google Cloud (App Engine, Cloud SQL, Cloud Storage, IAM, Secret Manager)

Tricentis · internal survey tooling

- C# / .NET Core, Entity Framework, SQL Server, Azure App Service and Key Vault

05/2018 - 09/2019

Catalysts

Lead Software Developer

Named Entity Recognition for ITSv · public healthcare insurance, team of 5

- Automatic extraction of entities from doctor's bills to support reimbursement
- Kotlin + Spring Boot, Vue 2 + TypeScript, JWT auth, RabbitMQ-orchestrated microservices on OpenShift

MES system · team of 3

- Workers scan containers on mobile phones as they move between steps; Infor ERP integration
- Java + Spring Boot, Angular, Keycloak SSO, WebSockets, self-written Android app for data-matrix scanning

03/2017 - 04/2018

Deloitte

Senior Software Developer

Confidential client projects. Highlights: Solr vs. Elasticsearch research, Angular and Vue frontends, React consulting, a larger system written in Go.

07/2015 - 02/2017

Catalysts

Junior Software Developer

U:Space, the University of Vienna student and teacher portal. Refactored a monolith into microservices on the Netflix stack (Eureka, Zuul, Hystrix); Liferay, Java + Spring portlets, Angular, LDAP auth, Jenkins.

2013 - 2015

TU Wien · Ventum

Tutor & Consultant

Tutor at TU Wien for theoretical computer science, logic programming, distributed systems and algorithms. Freelance consultant at Ventum Consulting: Oracle Identity Management integration and a Java tool connecting a few hundred servers.

EDUCATION

2011 - 2014

BSc Software & Information Engineering **WITH DISTINCTION**

TU Wien. Full-time studies, grade average 1.24. Assembler, C/C++, Java, Haskell, Prolog, JavaScript; algorithms, architecture, testing, security.

2005 - 2010

HTL Anichstraße, Innsbruck

Electronics, telecommunication and technical informatics. C/C++, Java, Assembler, ATmega microcontrollers, computer networks.
